# Performance

It's important to have a website that is always online and performing well

## Performance

Performance is key to having a fast and efficient website. When a visitor opens a site for the first time, they expect it to load within 3 seconds. A great first impression is crucial for online businesses, as speed plays a decisive role in shaping how a brand is perceived on the web.

● <b>First Contentful Paint (FCP)</b> Time it takes for the first visible element to appear on the screen	0.6 s
● <b>Time to Interactive (TTI)</b> Time it takes for the page to become fully usable and responsive.	0.7 s
● <b>Speed Index</b> Measures how quickly the visible parts of the page are displayed during loading.	1.0 s
● <b>Cumulative Layout Shift (CLS)</b> Tracks unexpected layout shifts to ensure a visually stable experience.	0.021
● <b>Largest Contentful Paint (LCP)</b> The time it takes for the largest contentful paint to appear on the screen	1.0 s
● <b>Total Blocking Time (TBT)</b> The total time during loading when the page is unresponsive to user input.	0 ms

# Updates

We continuously keep your WordPress site up to date.

In the WordPress technology ecosystem, updates are crucial to maintaining optimal performance and strong security.

# Backups

The only way to protect yourself in tough situations

A backup is your primary guarantee that your website can be fully restored after an outage. Backups are invaluable if you accidentally delete important elements, or if your website is hacked. That's why we always keep multiple backups of your site.

✓ **Your website is backed up regularly and securely.**
